GROSS ATTEMPT TO MISPEDE SENT THE LICKING DEMOC BACY.

From the Nawark Insily Advocate, May 21.1 In an article under the caption of "Money the Main Question," the Cincinnati Empirer grossly misrepresents the letter and spirit of the resolutions passed by the Democracy of Licking county at their convention last Saturday Two sets of resolu-tions were offered in the convention, both of which were practically of the same purport and meaning on the tariff question. But one of these sets of resolutions, which was offered as a abstitute for the other, was more pecific in statement on the silver testion

The substitute however which resolutions which were originally introduced. Its language, which is as foliows, speaks for itself:

"We congratulate the Democratic passage of the Wilson Bill, and accept it as the nearest attainable fulfillnent of the platform pledge in favor of tariff reform. We urge the Demorats of the Senate to end the delay so detrimental to the interests of the country, by the immediate passage of the bill for tariff reform.

But so far as the silver question

Rut so far as the silver question vas concerned, the resolution on that overwhelmingly. On the contrary it barely passed by a small majority, the vote being 107 years to 97 mays. The Enquirer's article, therefore, in

claiming or construing that any acion of the Democratic convention in this city of last Saturdry means that 'Money is the main question," is a perversion of the facts and a misren esentation of the sentiment of the Democracy of Licking county. Furthermore, if the idea had been

advanced in the convention of Saturday that the Enquirer would resort to such use of the silver resolution adopted as an argument against the immediate passage by Congress of the pending tariff bill, that resolution would not have received a dozen votes. It would have been scouted out of the onvention.

The Democracy of Licking county are not in favor of abandoning the up duries in this bill to any extent you great question of tariffreform for the please, and if it is any better than the silver question or any other question jdst now. MR. MILLS OBJECTS.

DOES NOT LIKE THE CHANGES IN THE WILSON BILL.

the Texas Senator Says He Will Not Vote For a Single Amendment Changing Ad Valorem to Specific Dutles-Favors Reduction In Taxation. Senator Mills does not favor protection amendments to the Wilson bill, and he does not hesitate to express his disap-

proval. He said in the senate on May on the last senate compromise bill: A change has come over the spirit of not got as much sea room as on that occasion. I find that the bill pending before us is not the Wilson bill, but a bill which ought perhaps to bear the honored name of the senator from Maryland, Mr. Gorman, or of the senator from Ohio, Mr. Brice. No man can torture mo into the admission that the bill pending be-

fore this body is in any respect an an was adopted, was equally as clear and swer to pledges made by the Democratic camphatic on the tariff question as the national convention to the Democratic people of the United States I have said —and I expect to say as long as I keep my understanding—that taxation levied on value is the only honest system of House of Representatives upon the taxation, and that the specific system of passage of the Wilson Bill, and accept taxation is imposed for the purpose of concealing facts and defrauding the concealing facts and defrauding the gov-ernment for the benefit of favored class-

es. I stand there today and shall stand

there as long as I live.
I rise to say that I do not intend to vote for a single one of these amendments changing the duties from ad va-lorem to specific. I am lamiliated action of the House in restoring the enough to have to be drawn nearer and income tax, and we hereby endorse it nearer to the McKinley act in the rates as a just and wise step toward the of duty and in the amount of robbery restoration of equality in taxation." indicted upon the poor working people On this resolution there was not a of the country, who have been starved dissenting voice or opinion in the to death under this system of taxation convention. Any resolution demand-ing the immediate passage of a turiff in humiliation and to take up even the reform bill by Congress, even though badges of protection. The very first though the measure called for more change made is one from ad valorem to radical reductions than those of the Wilson bill, would have been unanimously adopted by the convention of the last Saturday. The discussion of the McKinley protection are unit the pendical states of the last Saturday. McKinley protection act and the pend-

> will vote against these amendments, but that when they are incorporated in the bill I will vote for the bill, if it has 5 cents of reduction in it, as a choice between the two. The Democratic party said to the people in 1893 that protection is a fraud, and that the party was in favor of honest taxation for revenue alone. And there is where I stand. I want to make an honset effort to redeem that pledge, and I do not intend to go backward. I would rather vote to reduce the duties imposed by the Wilson bill. Every one of them is high enough I would have put more arti oles on the free list. I would haver reduced the cost of production on our manufactures, so that we could take the markets of the world and give employment to the people in honest work in factories instead of having them walking the streets and coming to Washington to tell the government of their dis--a distress which the protective tariff has put upon them. Breathe Through Your Nostrills. Our organism defends itself against nicrobes by different means and esecially by the mucus that is always on the surface of the epithelium, or uperficial cell tissue of all the muus membranes. This mucus is in every case bactericidal, and the mucus of the nose, particularly, has a marked bactericidal action on certain microbes. To anthrax it is espe-cially fatal, as three hours' contact at 38 degrees centigrade with the bacilli and spores of this disease was enough to destroy them. It is found that the greater number of microbes are equally susceptible to the influ-

ence of animal mucus. The air we breathe is freed in the upper air passages and especially in the nasal cavities of most of the solid particles it holds suspended, in cluding the microbes. These microbes, with their spores falling on the mucous surface, would multiply there if it were a favorable neighporhood for them, and in view of the number of these germs it would be an almost perpetually increasing source of infection. Thanks, however to the bactericidal action of the nucus of the nose, it not only acts as a mechanical barrier for particles floating in the air we breathe, but its defensive action is more direct, as it hinders or destroys the vitality of a large number of bacteria. -Pittsburg Dispatch.

Irrigation by Dog Power.

Manuel E. de Costa, who resides six

miles south of Sacramento on the Riverside road, has built an ingenious ma-

chine for irrigating his flower garden

and his orange and lemon trees. It consists of a wooden wheel 10 feet in dianeter and with a rim, or tire, about 2 feet wide. A dog is placed inside the wheel, which is turned by his weight

as he gallops in treadmill fashion. The

revolution of the axle turns a crank

which operates the handle of a pump

set in a dug well. After half an hour's

exercise the dog is taken out and a

fresh dog put in for another half hour.

The dogs seem to enjoy the work, for they bark and wag their tails when they

ire brought to the wheel. They know

that it means something good to eat at the end of the half hour's work.—Sac-
